

How to fold your mini-book

One sheet of paper, one small cut, eight little pages · about 3 minutes

1

Print the book sheet at 100% ("Actual size"). Lay it flat, pictures facing up.

2

Fold it in half the long way, top edge to bottom edge. Crease well, then open it again.

3

Fold it in half the short way, then fold each end in to the middle. Open it: you now have 8 boxes.

4

A grown-up cuts along the dashed line in the middle — across the middle two boxes only.

5

Fold the long way again, pictures outside. Hold both ends and gently push them together. The middle opens up like a plus sign.

6

Press it flat and wrap the pages around so the cover (with the title) is on the front. Ready to read!
