

Learn First: Meet the Insects

Look at each picture and say its name. Then turn the page and play! (1 of 2)

Butterfly

A butterfly tastes with its feet and drinks flower nectar through a long tube like a straw.

Ladybird

Ladybirds (ladybugs) are little beetles with spots. They eat tiny pests in gardens.

Ant

Ants are super strong and work together in big teams called colonies.

Bee

Bees carry pollen from flower to flower and make honey. Buzz!

Dragonfly

Dragonflies have four see-through wings and can fly forwards, backwards and hover.

Grasshopper

Grasshoppers have long back legs for big jumps.

Beetle

Beetles have hard, shiny wing cases like armour.

Firefly

Fireflies are beetles whose tails glow with light on summer nights.

Praying mantis

A praying mantis holds its front legs together as if it is praying, then grabs bugs fast.

Learn First: Meet the Insects

Look at each picture and say its name. Then turn the page and play! (2 of 2)

Cricket

Crickets chirp at night by rubbing their wings together.

Moth

Moths fly mostly at night and love bright lights. Many have furry bodies.

Caterpillar

A caterpillar eats and eats, then turns into a butterfly or a moth.

Mosquito

Mosquitoes are tiny biting flies. Only the females bite, and the bites itch!

Wasp

Wasps have a thin waist and black-and-yellow stripes that say “keep away”.

Match the Insect to its Name

Draw a line from each picture to its name.

Name: _____

Date: _____

•

• **Dragonfly**

•

• **Ladybird**

•

• **Bee**

•

• **Ant**

•

• **Butterfly**

Circle the Right Insect

Read the name, then circle the matching insect.

Name: _____

Date: _____

Circle the **Caterpillar**

Circle the **Grasshopper**

Circle the **Mosquito**

Circle the **Beetle**

Circle the **Moth**

Trace the Insect Names

Trace each name, then write it on your own.

Name: _____

Date: _____

Ant Ant

Bee Bee

Moth Moth

Wasp Wasp

Beetle Beetle
